By combining beauty with technology and sustainability, Italian porcelain slabs have expanded design limits and streamlined production processes, enabling the creation of ever more dynamic spaces... but this innovative material is not only for walls and floors.

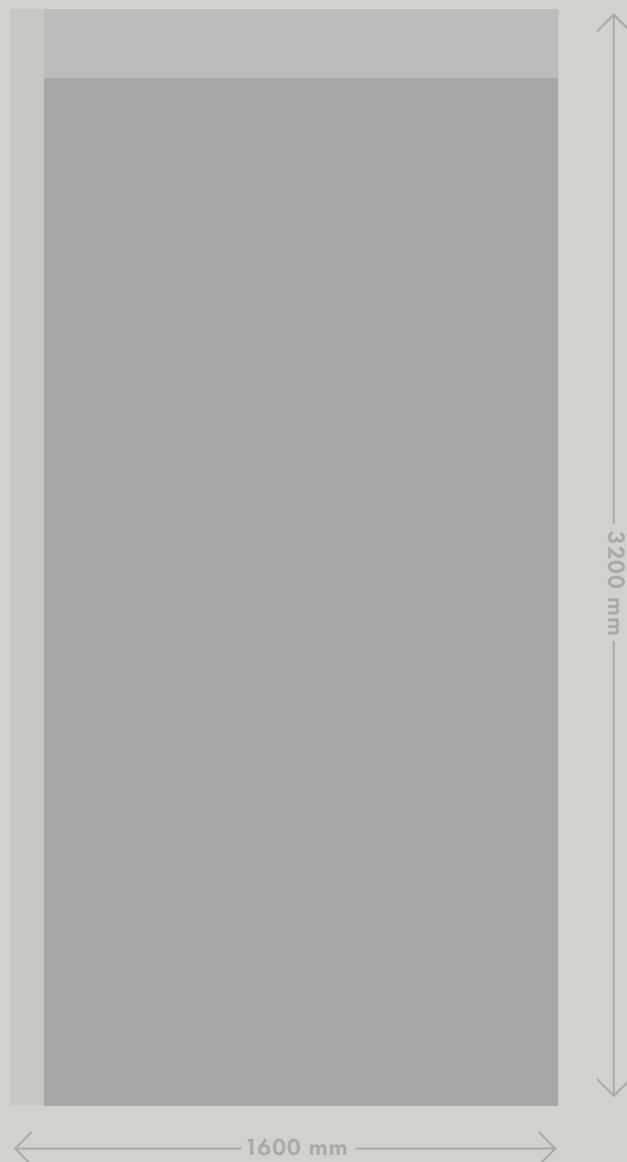

Through the Now Imagine campaign, and by demonstrating the material's potential in our showrooms, we hope to inspire designers to think of each slab as a creative surface.

Now Imagine is supported by a full service technical and design solution that enables architects, designers, and product manufacturers to incorporate large format Italian porcelain surfaces into their designs in new and innovative ways.

From laser templating, cutting and manufacturing to delivery and installation we take care of each step. This means there is no risk and no headaches. Create your design, choose from any of the one hundred and fifty available colours and styles, and we'll do the rest.

ITALIAN PORCELAIN SURFACES

Detailed over the next few pages are design specifications, products and services dedicated to porcelain surfaces that will stretch your imagination. Services that redefine how architects and designers approach material selection, providing creative solutions for the functional and aesthetic requirements of each project. Services that facilitate the creation of luxury stand-alone products such as bathroom vanities and whole home furniture, and help designers and architects transform their ideas into finished projects.

UNLOCK THE POTENTIAL OF THE SLAB

Large format porcelain slabs are one of the most sustainable and aesthetically appealing surface materials available in the world today. The wider availability of this cutting-edge surface in the UK has transformed the way these materials are used, presenting new beginnings, opportunities, and challenges. To unlock the full potential of large format porcelain slabs, a comprehensive UK-based cut-to-size solution is essential.

We are that solution.

Our new cut-to-size and cut-to-shape services empower designers to expand their creative boundaries and reach their design objectives. Cut-to-size benefits architects, designers, and contractors by providing practical solutions to design challenges. It is a comprehensive service that revolutionises how porcelain slabs are specified, offering considerable execution advantages. These advantages include shorter lead times, reduced onsite assembly and installation, less material wastage and lower risk of onsite damages.

INTRODUCING CUT-TO-SIZE

Porcelain slabs offer an extremely durable surface, but cutting and handling three metre high large formats onsite brings its own challenges, which can often result in chipping or cracking. By utilising our cut-to-size solution, the entire cutting process takes place offsite and is risk-free to you.

Cut-to-size eliminates the need for third-party operations including the transport of slabs between suppliers. Use cut-to-size for surface cladding, custom flooring, inlays and staircases. Also for projects where space is limited and manoeuvring full size slabs is impractical.

This level of support allows designers to have a relaxed approach to specifying large formats, and gives installers the confidence to handle slabs onsite and complete projects successfully. It's a collaboration that adds considerable value to a project, combining our expertise with your creativity, allowing this high-performing material to be specified with confidence and ease.

CUT-TO-SIZE LIGHTING INSTALLATION USING 6MM SLABS (FIG.6.1)

VERTICAL CLADDING

Achieving visual and tactile consistency in a given interior space through the harmonious use of materials, colours, and textures is a fundamental principle of interior design. Cladding is a highly effective way to achieve this, but this does not have to stop at the walls.

Being able to specify large formats on additional vertical surfaces provides exciting new design opportunities. With three metre long slabs you can promote this grand sense of scale, taking full advantage of less grout lines for a more seamless result. Experiment with pattern matching across cladded surfaces and achieve homogeneity and coherence in the design that is not possible with standard formats.

Leverage the longer lengths available with large format porcelain slabs to add interest to architectural details, including mouldings, columns, door skins, steps, archways, fireplace surrounds and feature walls.

VERTICAL CLADDING WITH PERFECTLY ALIGNED VEIN MATCHING (FIG.7.1)

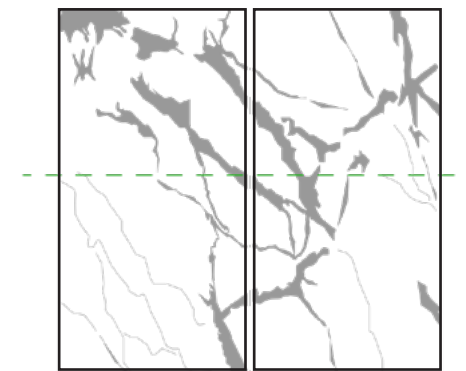

PERFECTLY ALIGNED VEIN MATCHING (FIG.8.1)

CLADDING WITH VEIN MATCHING

Vein matching involves placing panels so that the vein movement found in the material continues across adjacent surfaces. This veining flows from one piece onto the other creating a continuous vein pattern.

Through our cut-to-size services, vein matching can be maintained across cladded surfaces. By pre-cutting each panel offsite, any risk of breakage onsite, or mismatching pieces is significantly reduced. Installers can approach vein matching projects with confidence while designers can execute complex schemes.

VEIN MATCHING (FIG.8.2)

BESPOKE FLOORING DESIGNS

Create unique and visually stunning flooring designs on a larger scale by leveraging the full size and aesthetic appeal of large format slabs. Longer runs provide a seamless design with fewer grout lines. With our cut-to-size services, you can experiment with geometric patterns and curves to create your own bespoke cosmati flooring designs. Suitable for large scale projects spanning several hundred square metres, to a single inlaid floor for an entrance lobby, designs can be created for any style, from contemporary to classical. Geometric designs can be used to create intricate patterns and shapes, while curved designs can help with spatial zoning.

THE PROCESS

Be bold, experiment and elevate your room with a custom designed inlaid porcelain floor. Incorporate larger single pieces up to 3200 x 1600 mm and choose from over one hundred colours, textures and styles of porcelain slabs.

Our team will work with you to create your flooring design, bringing your vision to life and elevating the beauty of your space. Your design will be prepared offsite at our UK manufacturing facility. It will be carefully packaged and supplied with technical drawings. All flooring is supplied with clear piece numbering, to ensure successful and reliable installation.

CREATE A UNIQUE FLOOR WITH GEOMETRIC SHAPES, VIBRANT COLOURS, AND DIVERSE TEXTURES (FIG.24.1)

FURNITURE INLAYS AND TOPS

Reimagine your cherished furniture pieces with the timeless allure and durability of a porcelain inlay or top. Upgrade your existing table tops and furniture inlays with precision cut-to-size porcelain surfaces, made possible by our advanced CNC cutting technology. We can accommodate any shape, including ovals, irregular shapes, or rectangles, and provide square or curved corners to your exact specification or technical drawings.

Request circular diameters up to 1600 mm or rectangular pieces up to 3200 mm in length, while you can choose from over a hundred colours and textures, with an edge profile suitable for your needs.

The use of a porcelain inlay within existing furniture is both an elegant, cost effective and practical choice, offering beautiful variations of colour, style and texture. Porcelain also provides a durable and waterproof surface that is easy to maintain and suitable for hospitality and commercial remodelling projects.

3D CLADDING APPLICATIONS

Through the cut-to-size service, we are able to supply pre-prepared 3D cladding for a whole host of practical, artistic and time-saving applications. We meticulously label each piece and provide precision cut mitred edges for effortless installation. Employing pre-cut cladding streamlines the fabrication process, resulting in significant cost and time savings onsite.

3D cladding solutions can be used for residential projects both indoors and out, and for a host of retail and hospitality applications including plinths, planters, display stands, seating and customer service counters.

Architects can also exploit the beauty and practicality of porcelain slabs to explore every facet of stair design including steps, treads, nosing, risers and handrails.

STAIRCASE, STEPS AND TREADS

Contemporary staircase design embraces clean lines and innovative materials. Through our cut-to-size services architects and designers can now exploit the beauty and practicality of porcelain slabs to explore every facet of stair design including steps, treads, nosing, risers and handrails. We provide solutions for commercial and residential projects, and offer surfaces that are suitable for both internal and external spaces.

Use cut-to-size for projects of any scale, from a single step within a split-level scheme, to a full stairwell design, while our expertise and support ensure that your project is completed on-time and on-budget. Both cladded treads and profile edge steps are possible and all can be supplied with matching skirting and wall tiles. For accurate specification we recommend our onsite laser templating service to ensure the precision and fit of every step.

TREAD AND NOSING PROFILES

Our steps and treads service provides a comprehensive solution for clients seeking bespoke steps, treads, and risers. We offer full laser templating to ensure accurate fitment and a smooth installation. All staircase projects are manufactured in the UK, which translates into a hassle-free process and reliable lead times.

On the following page you will find a selection of available nosing profiles, suitable for internal and external applications. All steps are available in 12 mm and 20 mm thicknesses and can be supplied with matching risers. External steps use 20 mm formats with a Grip finish. Options are also available for configuring anti-slip grooves and pre-installed channels ready for LED strip lighting (not supplied).

NO DISCOLOURATION OR FROST DAMAGE, PORCELAIN SURFACES ARE DURABLE FOR ALL YEAR ROUND OUTDOOR USE (FIG.40.1)

CNC EDGE PROFILING (FIG.41.1)

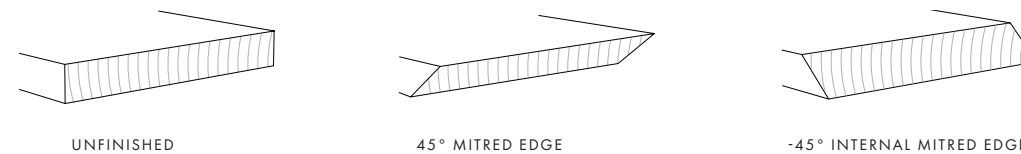

EDGE PROFILING AND MITRES

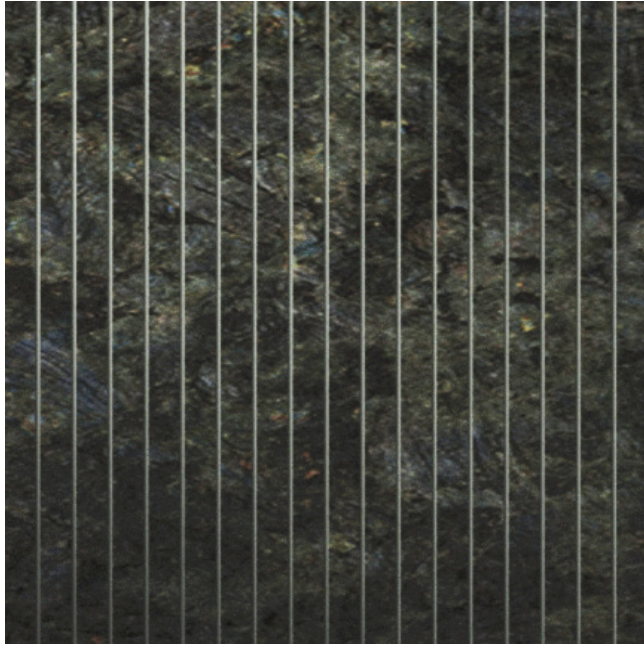

Latest generation contouring machines prepare all profiling requests to exact specifications. Intricate cut-outs including circular, square or irregular shapes can be specified as well as decorative elements such as skirting and step tiles. We offer dependable lead times and execute all requests from within the UK.

CLADDING PROFILES

Through the cut-to-size service, we provide cladding for a whole host of practical, aesthetic and time saving tasks. Supplied with carefully labelled, precision cut mitres, pre-cut cladding saves considerable time onsite, improving efficiency, reducing waste and the chance of damage. A laser templating service is also available for complex cladding projects.

FLUTED DECOR (FIG.42.1)

FLUTED DECOR

Fluted Decor can be incorporated into cut-to-size requests and is priced per square metre. Delicate grooves are cut into the material, creating a subtle contrast and variation to the surface design.

Fluted grooves are 2 mm in thickness and can be specified at 5 mm, 10 mm or 20 mm intervals and a vertical or horizontal direction.

STRIPS DECOR (FIG.42.2)

STRIPS DECOR

Individually cut strips can be supplied in widths between 26 - 34 mm. Strips can be cut to clad flat or curved surfaces and applied to curved walls and pillars. Accurately angled mitred edges ensure a flush finish.

Each strip is carefully labelled to simplify the installation process and ensure the veining and pattern matching continues across surfaces to be cladded.

Italian porcelain surfaces are available as luxurious and elegant table tops and table inlays. Known for their durability and timeless beauty, and with a wide selection of colours and styles to choose from, each top boasts its own delicate veining and unique patterns. There is a choice of three finishes including Polished, with its high shine, Honed which adds a soft sheen, or Natural with its delicate textures, each adding an air of sophistication and refinement. Please note that if you are supplying your own base, porcelain table tops are extremely heavy and require a very sturdy support.

CONFIGURATION

Model	TOV-TT01	TOV-TT03	TOV-TT02
			
Maximum Dimensions	2900 x 1400 mm	2900 x 1400 mm	1400 x 1400 mm
Model	TOV-TT04	TOV-TT06	TOV-TT07
			
Maximum Dimensions	2900 x 1400 mm	2900 x 1400 mm	1400 x 1400 mm

KITCHEN COUNTERTOPS

Remodel kitchen islands and countertops with a brand new porcelain worktop. Install precision cut high-performance worktops from a choice of over one hundred stunning colours and styles. Upgrading existing kitchen worktops is easy... Select your chosen surface from our extensive collection of Italian Porcelain. Then schedule an appointment to carry out a detailed laser templating of the project site. When the new top is ready, we send our installation team to deliver and install it. The entire process is stress free, and because we take care of the entire process from templating, manufacturing to installation, it is also totally risk free.

COUNTERTOP DATA SHEET

Length (L)	∞ (Max 3200 mm without a join)

PORCELAIN SURFACES REDEFINED

The products presented in this catalogue are available in a wide range of colours and styles. All colours can be paired with matching large format Italian porcelain slabs for walls and floors. Porcelain slabs are the latest generation of surface materials that combine lightweight design with increased technical performance. These slabs redefine conventional

size rules, with 160 x 320 cm formats that offer unparalleled versatility for ambitious design schemes. Additional formats measuring 120 x 280 cm have been introduced to provide practical solutions for walls, minimising waste and eliminating the need for cutting during installation. With a thickness of just 6 millimetres, these porcelain slabs can be seamlessly

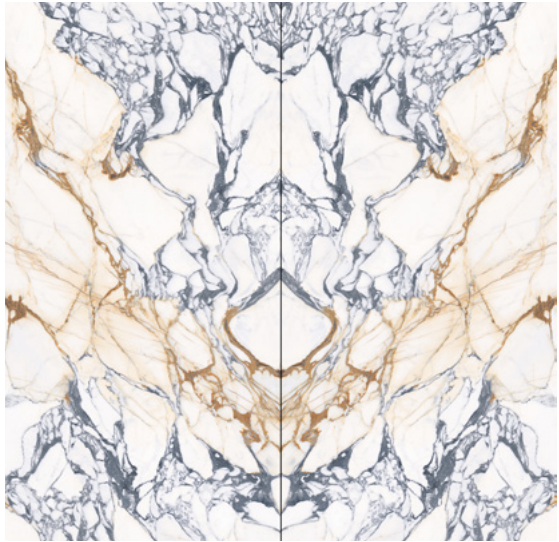

used for flooring, wall cladding, or fixed to any vertical or horizontal surface including upstands and skirting. The result is an easy-to-install, continuous flat surface with minimal grout lines and maximum decorative impact.

SUSTAINABILITY

All porcelain surfaces are manufactured using sustainable processes that minimise environmental impacts, conserving energy & natural resources. Produced without the use of any harmful or radioactive materials, no hazardous emissions are emitted and they will not affect air quality. All waste material that is associated with the supply of the tile surface

is fully recyclable and all packing material is produced with recycled material. This means that all surfaces have a reduced environmental impact throughout their lifespan. With no toxic or polluting substances used in their composition and production they meet the highest standards of quality and environmental regulations, conforming to the following certifications:

BREEAM®
